HOW DO I GET EMERGENCY ALERTS IN FLATHEAD COUNTY?

Flathead County runs Genasys Emergency Notifications. Create an account at flatheadcounty.genasys.com, add your phone or email, choose alert types and save. The county says you must sign up to receive most alerts, and it advises using more than one source for emergency updates.

THE STEPS

01 Open flatheadcounty.genasys.com/portal/en and create an account.

02 Add a phone number or email address.

03 Select alert types: evacuation, severe weather, public safety threats, road closures and hazards, missing persons.

04 Save your choices.

05 Wireless Emergency Alerts reach phones without signing up, but most other alerts need the sign-up.

06 Use more than one source for emergency updates, as the county advises.

THE CHECKLIST

- ☐ Genasys account created
- ☐ Phone and email added
- ☐ All household adults signed up
- ☐ A battery or hand-crank radio as a second source
